HEAVY SNOWFALL THREATENS TIE-UP OF ROADS IN EAST

Storm Extends Along the Atlantic Coast From New England to Georgia.

COAL REACHING SEABOARD

Results of Closing Order Fully Up to Expectations, Garfield Announces.

WASHINGTON, Jan. 22 (By A. P.)—Snow was falling today throughout the Eastern half of the country north of Georgia and promised to tie up the country's transportation system as badly as they were before the beginning of the five-day industrial shutdown, designed to aid the railways in clearing their lines of congested traffic and to place coal in communities suffering from the severe cold.

From the New England states southwest along the Atlantic coast to the Mississippi River the storm raged. It began in the night and the snow fell steadily in most sections. Weather Bureau officials said it would continue tonight.

Heavy snows compelled the abandonment of scores of passenger train schedules. Locomotives so released were diverted to coal traffic.

The Fuel Administration declared plenty of empty cars were being delivered to mines in the coal regions, and that loading was going ahead steadily. The output of many mines was restricted today, however, by reason of miners to work, or illness caused by cold weather.

Most available motive power was used on coal trains with the result of an even greater congestion of general freight. All hopes of clearing up the situation with regard to weather is resumed were abandoned by railroad administration officials.

Ships Getting Coal.

Large supplies of coal are moving in Eastern households and Trans-Atlantic shipping interests.

Reports here indicate that the first blizzard Monday had been strictly observed. Fuel Administrator Garfield declined to say whether an extension of the closing period would be necessary.

Results Satisfactory.

"Results of the operations of the closing order have been fully up to our expectations, in so far as the weather permitted," Dr. Garfield said.

Reports here said New York railroad men had enough coal to fill bunkers of 50 vessels loaded with supplies for the American army overseas and the allies, and more than a hundred ships in Hampton Roads were being loaded rapidly. Plans to commandeer tugs if necessary are being considered by the Shipping Board.

Officials who recently sought a railroad embargo on general freight as a means of relieving congestion declared again that this step would have to be taken or non-essentials denied transportation if the freight tangle was to be straightened out. Director-General McAdoo failed to order the embargo despite its recommendation by the war conference.

Ships Tied Up at New York Reduced From 215 to 81.

NEW YORK, Jan. 22 (By A. P.)—In the face of the worst ice jam in New York harbor in many years, encouraging headway had been made in coaling ships during the fuelless days.

No essential ship in the harbor is being prevented from sailing for lack of fuel, according to J. E. Parsons, coal expert for the Shipping Board. He said that of 213 ships awaiting coal in this port a week ago, but 81, none of them "vital to the needs of the allies," remained to be coaled today.

The snowstorm and ice floes today cut the movement of tugs to 50 percent of normal, according to officials.

TO SAVE FUEL BY EXTRA SLEEP

Children in Alton Orphanage to Reduce Hour Earlier, Get Up Hour Later.

The management of the Cathedral Orphanage on State street, in Alton, has devised a plan for conserving fuel at the institution.

The children will be put to bed one hour earlier in the evenings and will be allowed to sleep one hour later in the mornings. The twice-a-week washing at the orphanage will be replaced by washing only once a week.

HERTLING TO SPEAK THURSDAY

Chancellor to Deliver Prepared Speech Before Reichstag

COPENHAGEN, Jan. 22 (By A. P.)—The Zeitung Am Mittag of Berlin says that Count von Hertling, the imperial German Chancellor, will deliver his prepared speech to the Reichstag main committee Thursday.

The newspaper adds that Dr. von Kneislmann, the German Foreign Secretary, is conferring with the party leaders and that he will participate in the debate which will follow the Chancellor's speech. The debate is expected to last three days.

NEW ANTI-U-BOAT 'SHELL EXPLODES IN WATER ON CONTACT

Missile Dives When It Hits Surface and Is Set Off When It Strikes Solid Object.

WASHINGTON, Jan. 22 (By A. P.)—The "nonricochet" shell, a weapon as deadly as the depth charge, is the newest device perfected by the navy ordnance experts for use against German submarines.

The new shell dives when it strikes the surface of the water instead of bounding as do the ordinary missiles used in either naval or coast defense artillery. The charge can be made to explode on contact with a solid surface under the water or at a predetermined depth. The value of the latest anti-submarine weapon lies in the fact that shots which fall slightly short will be of as much effect as those which register direct hits.

The Navy Department has forbidden the publication of details of the invention, but it is known that the British and French Admiralties also have adopted it.

SEVEN STREET CAR LINES GET COKE FOR HEATING

First Consignment of 150 Tons Is Allocated; Burning of Soft Coal Unsatisfactory.

The United Railways Co. has obtained 150 tons of coke, for use in heating street cars, and has allotted it to the Park, Jefferson, Broadway, Cass, Lee, Wellington and Bellefontaine lines. Another expected consignment will be used on the Olive line.

The company has been burning soft coal this season, because the Government has ordered that metallurgical districts shall have first call on coke. The coke just obtained costs \$10 to \$11 a ton, or more than twice last year's price.

The use of soft coal has caused complaints from passengers and has been said to contribute to the smoke nuisance in the city. The heaters are not well adapted to soft coal.

PERSHING REPORTS DEATH OF CORPORAL IN ACTION

No Details Given of Engagement Jan. 20, in Which Infantryman Was Killed.

WASHINGTON, Jan. 22 (By A. P.)—Gen. Pershing today reported the death of Corp. Walter Roberts of the infantry, who was killed in action Jan. 20. No details of the engagement were given. His mother, Mrs. Kate Roberts, lives at Hartline, Wash.

DISCUSS WOMEN'S SHOE STYLES

Manufacturers and Economy Board Confer on Changes.

BOSTON, Jan. 22 (By A. P.)—Representatives of the New England shoe trade will confer with members of the Commercial Economy Board in New York tomorrow regarding further changes in styles for women's shoes for fall wear with a view to conserving leather. Although the board recommended a maximum 9-inch height in women's boots, the shoe men stood out for 8 1/2 inches and accepted the suggestion that colors be limited and unnecessary embellishments eliminated.

Aside from the standard black, without patent leather, nevether leather colors more or less in vogue, the plan now is to have tans and grays, with two shades of each. While there will be limit on designs, dealers said the selection of gray colors were different because of the problem of having tanners produce colors that come nearest the standard specified by the board. At conferences here dealers agreed that cloth tops would be popular, as this method of manufacture would result in a great saving of leather.

Australian Wheat Shortage Reported.

OTTAWA, Ontario, Jan. 22 (By A. P.)—A dispatch received by Reuters' Agency from Adelaide says South Australia's wheat crop this year is estimated at 26,500,000 bushels, or 18,500,000 bushels below the crop of last year. A smaller area was sown and the weather was rainy and unfavorable.

The VITAL Thing

That makes for success in advertising is reaching the greatest number of worth-while buyers at a minimum cost per thousand circulation.

St. Louis advertisers, through years and years of experience, have found the POST-DISPATCH not only brings the most profitable results, but is the most economical—rate per line per thousand circulation considered.

That's why they again concentrated in it yesterday, Monday, as follows:

POST-DISPATCH alone 43 Cols.
3 out of all 4 of the "others" combined 38 Cols.

POST-DISPATCH exceeded all 3 combined... 5 Cols.

COAL DIVERSION TO CHICAGO EXPECTED TO HIT ST. LOUIS

Order Directs 10 Per Cent From Southern Illinois Fields to Lake City.

CLOSING COMPLAINTS

Union Station Lunch Room Reported Open All Night; Movies Dark Again Today.

Reduction of the St. Louis coal supply is expected to result from the order of Fuel Administrator William C. Crossley of Illinois, directing that 10 percent of the output of the larger mines in the Southern Illinois fields, near St. Louis, be shipped to Chicago.

Members of the St. Louis Fuel Committee hope that the effect of this order will be overcome by improved transportation and increased production at the mines.

The evident purpose of the diversion order is to increase the coal supply of Chicago at the expense of St. Louis and Missouri. There is no question that Chicago needs coal.

Frank E. Crossley, Fuel Administrator, said yesterday in Kansas City, however, that there has been a great deal of St. Louis coal diverted to Chicago in advance of the order.

Division Order Qualified.

P. H. Greenlaw, secretary of the Fifth and Ninth District Coal Bureau, said that the order for the 10 percent diversion to Chicago applied only to mines of more than 500 tons daily capacity, which are customshippers to Chicago, and that it was further qualified by the exemption of railroad and public utility contracts in the St. Louis district, so that, while it was not possible to give an approximation of the tonnage that would be diverted, he did not think it would be enough to greatly affect the St. Louis supply.

SENATE ADJOURNS TWO DAYS TO COOL OFF STONE DEBATE

indications, However, That Partisan Discussion of War Will Flare Up Again Thursday.

MYSTERIOUS TRAVELER'

Penrose in Reply to Missourian Attacks House as 'Texas Lobbyist' and 'Would Be Caesar.'

WASHINGTON, Jan. 22 (By A. P.)—Indications today are that partisan debate in the Senate precipitated by Senator Stone's attack on the Republicans and Theodore Roosevelt will break out again Thursday when sessions are resumed.

A two-day adjournment was taken yesterday in the hope that both sides would cool off and permit the controversy to drop, but many Senators did not take the time off, and it will likely be a long haul.

In his long prepared speech Stone accused Republicans of playing politics in their criticisms of the Government's conduct of the war and called Theodore Roosevelt "the most卖弄的 man of consequence in America."

Penrose's Great Desire.

Senator Penrose in his reply conceded his desire to oust the Democrats from control of the Government, declaring a more efficient administration would be thus secured.

Senator Lodge of Massachusetts spoke more seriously. He deplored injection of politics into the war, defended Col. Roosevelt, declared that the Republicans have given and will continue to give full support to the administration toward winning the war, but will continue criticisms of mistakes and inefficiency.

Penrose Pleads Guilt.

Senator Penrose said he was surprised that Senator Stone's statement was not more formidable.

"Realizing what a discredited political character the Senator has always been," Senator Penrose continued, "I plead guilty to everything he has said about me. But I do not think political parties should be abolished simply because the country is at war. Bipartisan organization in England has failed. I am afraid that if the Democratic party should go out with the war, but I am determined that the Republican party shall retain its organization and support the administration in every laudable way, going on with criticism."

To criticize is a public duty as I conceive it. How also would we remedy defects unless attention is called to them? It is not likely that the Cabinet heads guilty of inefficiency will call attention to it. Of course, I favor restoration of the Republican party to power. I am sufficiently impressed with the inefficiency of the present administration to think that a better administration, having more confidence of business interests and the people, could be given under Republican regime.

Penrose added he had never heard of any "divineointment" on Mr. Wilson's head." The Missouri Senator, he thought, spoke of the President as if he were the whole Government.

"Is Mr. Wilson to remain in power forever?" Penrose inquired. "Is there no occasion to succeed him?"

The administration, he thought, did not have the confidence of the American people. He had kept silent and voted for administration measures with few exceptions, he said, in order not to embarrass the administration, "knowing the hour of reckoning would come and the country would know what it was entitled to know."

Penrose British Statesmen.

Senator Stone's speech, however, Penrose declared, was a direct invitation to a reply. The attitude of British statesmen, who "take the public into their confidence, enrage irresponsible officials, reorganize and go ahead," Penrose spoke of "mysteries."

The Pennsylvania Senator then referred to the appointment of E. M. House, head of the American mission to Paris, as the "President's personal representative."

"It's strange doctrine," he continued, "that we have personal government in this country. Wilson is not the American Government. The Ambassador, a consular official, is to be confirmed by this Government before he can be sent abroad. I never heard of a 'personal representative' before. I have heard of Kings and Caesars doing it, but it is not good democratic method."

He referred to House as "a mysterious traveler, whose expenses are paid from the contingent fund."

Senator Stone interrupted to defend House, whereupon the Pennsylvania Senator asked how the Colonel got his military title. A roar of laughter swept the galleries.

GERMAN SOCIALIST
PAPERS NOT OPPOSED
TO BELGIUM VIOLATION

Continued From Preceding Page.

would have been an important political fact to which the party later gave reference with pride. At any rate, that would have been far more honorable than to continue to extol the virtues of the spirit of the German's boots on its forehead.

But higher than all considerations of policy and the dignity of the party stood considerations of membership, printing presses, organization. And so the Vorwärts now lives as two-paged evidence of the unlimited brutality of junkerdom in Berlin and in Louvain, and of the unlimited opportunism of the German social democracy.

In Absurd Discussions.

The right wing stood more by its principles, which resulted from political considerations. Wolfgang Heine crassly formulated these principles of German reformism in an absurd discussion as to whether the Social Democrats should leave the hall of the Reichstag when the members rose to cheer the Emperor's name, or whether they should keep their seats "until the creation of a republic in the German empire is now and for some time to come out of the range of all possibility, so that it is not really a matter for our present policy." The practical results still not yet achieved may be reached, but only through co-operation with the liberal bourgeoisie. "For that reason, not because I am a stickler for form, I have called attention to the fact that parliamentary co-operation will be rendered difficult by demonstrations that needlessly hurt the feelings of the majority of the house.

But the complete abandonment of monarchical etiquette was enough to destroy the hope of reformist co-operation with the liberal middle class, then certainly the break with the bourgeois "nation" in the moment of national "danger" would have hindered, for years to come, not only all desired reforms, but also all reformist desires. That attitude that was dictated to the routinists of the party center by sheer anxiety over the preservation of the organization was supplemented, among the Revisionists, by political considerations. Their standpoint proved in every respect to be more conservative and won the victory all over. The entire party press is now industriously proclaiming what it once heaped scorn upon, that the present patriotic attitude of the working class will win for them, after the war, the good will of the possessing classes for bringing about reforms. "Look at Belgium!"

Therefore, the German Social Democracy did not feel itself, under the stress of these great events, a revolutionary power with tasks far exceeding the question of widening the state's boundaries, a power that does not lose itself for an instant in the nationalistic whirl, but calmly awaits the favorable moment for joining with the other branches of the International in a purposeful interference in the course of events. No, instead of that the German Social Democracy felt itself to be a sort of cumbersome train threatened by hostile cavalry. For that reason it subordinated the entire future of the International to the quite extraneous question of the defense of the frontiers of the class—because it felt it first and foremost to be a conservative state within the web. "Look at Belgium!" cries the Vorwärts to encourage the workmen-soldiers. The People's Houses there have been changed into army hospitals, the newspapers suppressed, all party life crushed out. (A sentimental correspondent of the Vorwärts writes that he was looking for Belgian comrades in the Maisons du Peuple and found a German army hospital there. And what did the Vorwärts correspondent want of his Belgian comrades? "To win them to the cause of the German people—just when Brussels itself had been won 'for the cause of the German people'!") And therefore hold out until the end, "until the decisive victory is ours." In other words, keep on destroying, let the work of your own hands be a terrifying lesson to you. "Look at Belgium," and out of this you draw courage for renewed destruction.

What has just been said refers not to the German Social Democracy alone, but also to all the older branches of the International that have lived through the history of the last half century.

FOUR BOATS SINK AT MEMPHIS

MEMPHIS, Tenn., Jan. 22 (By A. P.)—Ice floes sweeping southward on the crest of a rapid rise in the Mississippi River, due to the breaking of ice in the riverway and tributary streams, caused four steamboats to sink yesterday, tore others from their moorings and damaged a number of small craft.

The excursion steamer De Soto, valued at \$50,000, the Government towboat Graham, valued at \$27,500; a Government grader boat, valued at \$37,500, and a Government quarter boat were sunk. The excursion boat Majestic and the packets Georgia Lee and Fox Herald were among the steamers torn from their docks, but they found a safe anchorage.

The steamer Georgia Lee, valued at \$75,000, was sunk today by the heavy ice. She will be a total loss.

Customers Find Chinaman. Customers who had waited since Christmas for their laundry broke open the door of the establishment of Louis Wing, a Chinaman, at 6218 Easton avenue, yesterday afternoon, and found Wing's body hanging in a rear room. He apparently had been dead for several weeks. Wing had conducted the laundry for 20 years.

TWO ENGAGEMENTS IN FAMILY ANNOUNCED

Miss Dymple Meyer and Henry Bigelow and Ridgely Meyer and Miss Mary Johann to Wed.

HERE have been two engagements recently announced in the family of Mr. and Mrs. G. Theodore Meyer of 5869 Cedar Avenue, that of their daughter Miss Dymple Meyer to Henry Bigelow, and of their son Ridgely Meyer to Miss Mary Johann.

Miss Meyer was educated in St. Louis and is a member of the Sigma Tau Epsilon Sorority, and is one of the most popular members of her set. Mr. Bigelow is the son of Mr. and Mrs. Charles F. Bigelow of 5017 Cabanne Avenue and belongs to the Alpha Delta Sigma Fraternity.

Miss Johann is the daughter of Mr. and Mrs. H. A. Johann of 5157 Kensington Avenue. No date for either wedding has been set, but that of Miss Johann and Mr. Meyer probably will take place in March. Another daughter of Mr. and Mrs. Meyer, Miss Bobbie, now becomes the bride of Murray MacKenzie last fall. She will come with her husband and his parents, Mr. and Mrs. Alexander MacKenzie, next month for Brazil, where they will reside. Mr. and Mrs. Alexander MacKenzie are at present making a tour of the United States.

Social Items

Col. and Mrs. Horatio G. Sickle recently arrived in St. Louis and are at the Westmoreland Hotel. They came from the Mexican border, where Col. Sickle was stationed. Mrs.

An Unfailing Way
to Banish Hairs

(Beauty Notes)

Use hairy growths can be removed in
the following way: If you have a
small original package of deodorant and
a paste made of the powder and
water, apply to the hair. This
should be left on the skin about 2
hours, then wash and dry. The
wash, and every trace of hair will
be removed. As a result of this treatment

To Relieve Catarrhal Deafness and Head Noises

If you have Catarrhal Deafness or
head noises, mix your cigar ash and
set 1 cupful of Parment (double
strength), and add to it 1/4 pint of
hot water and 4 ounces of granu-
lated sugar. Take 1 tablespoonful
4 times a day.

This will often bring quick relief
from the distressing head noises.
Clogged nostrils should open, breath-
ing become easy and the nose stop
disappearing in time. It is easy
to prepare, costs little and is pleasant
to take. Any one who has Ca-
tarral Deafness or head noises
should give this prescription a trial.

"Yes, I Earn a Good Salary, but
I Can't Save Much"

Hundreds, perhaps thousands, of
men and women of St. Louis are saying
this to themselves daily. Maybe
you have been turning this thought
over in your own mind. Others have,
and many have solved the problem.
They decided to save by a plan.
That is, they assume that they owe,
and must pay weekly a certain sum
to the Mercantile Trust Company.
They pay it, no matter what the
sacrifice—and they get ahead.

Saving money is not a matter of salary,
but of determination. And it
doesn't take an over-abundance of
determination either, if you'll bring
your savings to the Mercantile Trust

After Your Child is 3 Years Old
The sweet liquid laxatives on the market are prepared
especially for infants and after a child reaches the age of
two or three years it needs something stronger than the
weak syrup available on the market.

LAX-POS WITH PEPSIN fills this long-felt want.

It regulates the bowels without griping or disturbing
the stomach. A Liquid Digestive Laxative. Pleasant to Taste.

LAX-POS WITH PEPSIN
Really Acts On The Liver

One of the principal ingredients in LAX-POS WITH
PEPSIN is an Extract of May Apple Root. Any physician
will tell you that the medicinal properties of May Apple
Root is the only vegetable known to Medical Science that
acts on the liver very much like Calomel without the
seizing effect of Calomel or risk of salivation. Therefore
the May Apple Root Extract is the palatable liquid
medicine it needs for any member of the family who is ill.

Good for the Child, good for the Mother, good for

SABLE SKIN, 6 BY 5 INCHES, BRINGS \$250

Morning's Sales at Fur Auction
Total \$228.70; Silver Fox
Skin \$1.00.

The sales of 618 Russian sable
skins at the Funsten January auction
today resulted in the most spirited
bidding of the sale. One skin, about
six by five inches, was bid up to
\$250. It was a particularly fine
specimen. The whole lot brought
\$22,900.

The morning's sales totaled \$228.
70. Six thousand white hares
brought \$7500 at 98 cents to \$1.30
each; 550 cross fox skins sold for
\$3500, the highest price for a single
skin being \$125.

Silver fox furs, always the height
of fashion and the highest priced of
all furs, sold yesterday at the first
day of Funsten Bros. & Co.'s January
auction at prices considerably
lower than the last sale, but
in former sales. The high price for
a single skin was \$750, but in former
sales perfectly matched skins have
brought as high as \$1500 each.

The total consignment of silver
foxes was 425 skins. They sold for
\$125,000, or an average of about
\$294 each. Members of the Funsten
firm said this collection did not contain
the finest silver foxes, which
usually are reserved for the autumn
sales, when the demands of fashion
are greater, but was made up of ordinary
or below average skins. A
number of badly damaged skins lowered
the average price considerably.

The total sales yesterday were
more than \$500,000, and were
more than 300 buyers present and
bidding was lively all day. The mar-
mot and nutria skins showed decided
advances over former prices, selling
at about \$1 a skin for the quality
which at this time last year brought
40 to 45 cents each. These skins are
being used extensively for lining
coats for soldiers and others who
are much exposed to cold weather.

The sale continued about 12 hours
yesterday, no adjournment being
taken for lunch. Coffee and sandwiches
were served to the buyers, who
remained in their seats.

A statement of the results of yes-
terday's sale, issued by the auction
company, showed that the total had ad-
vanced from 10 to 100 per cent over
the sale of a year ago for the same
quality of skins. The offerings to-
day include \$52,000 mink skins, 65,
000 mink and 12,000 kolinsky.

In the first hour of selling at the
Funsten Bros. fur auction this morning,
the second day of the sale, the skins disposed of brought \$155,600.
The items sold were \$352,000 mole-
skins for \$165,000; 1000 white fox for
\$35,000 and 12,000 kolinsky for \$15,
000.

WOMAN TELLS OF REMARKABLE RECOVERY FROM RHEUMATISM

Helpless for Years Devised Ropes
to Lift Her From Bed.

Hearing of remarkable recovery
from rheumatism led us to Moosup,
Conn., to investigate. We found a
Mrs. Cheney, who said:

"I was helpless. Physicians wanted
to operate on me and try to remove
the deposit. My legs were drawn up
so that they could not be straightened,
and to have anyone lift me from the bed
was agony unbearable. For one year I did not leave the bed
without assistance. How helpless I
was and what I suffered only, God
and myself know."

"The rector of St. Alban's Church
in Daniceton knows my condition, for
he called on me while I was confined
to bed for the purpose of giving me
comfort. When I started on Var-
ne-sis I was in bed and continually
getting worse, and for almost a year
I did not see any improvement
except that my stomach was
better and my strength began to return."

"From an absolutely helpless crip-
ple who could only turn in bed with
the aid of a rope rigged over the bed,
am now walking about as you see me,
without the aid of crutches or cane."

"I am always glad to hear from any
rheumatic sufferers and let them know
how I regained my health. My
address is Postoffice Box 134, Moose-
up, Maine.

A Lesson From Potatoes—

A Dollar in normal times will buy 60 pounds of Potatoes—today a dollar will buy but 33 pounds.

In other words, the purchasing power of a dollar today is half of peace times—but you can make it worth more by saving it until conditions are normal.

The logical way to save these dollars is in a savings account, here it is safe—and while doubling, is earning interest which is compounded semi-annually. One Dollar will open an account.

AMERICAN SEES AN INSTANCE OF GERMAN ATROPHY

for months had been at work right

behind the trenches, often right in

them. They were at Cambrai.

British Capture of Marcoing:

The Germans came through, so they fought the Germans with what came to hand, whether the rifle of a dead Tommy or with a pick or a shovel. When the Germans were stopped, they went back to digging trenches and laying them. Their commandant got an order from general headquarters to choose a number of his most intelligent, most soldly noncommissioned officers and send them to an ancient city where the army has established a series of schools and colleges, there to learn to be officers. He had chosen these men and one look showed that he had chosen well.

"We were talking about the German Government and the German people," the Sergeant went on. "And I said I'd seen some things maybe they wouldn't believe if I told home and told about. I saw one thing I'll never forget. It was a girl I saw—a French girl.

He leaned forward in his seat. In these French railroad cars the passengers sit four or six in a compartment. We were facing one another, very close.

"You know," he said, "the British took Marcoing in that Cambrai drive so quickly the Germans didn't have time to get the French people out and drive them back so they could make them work some more, the way they always do if they can. Our outfit came right behind the British infantry and 18-pounders, the light guns, laying ties and spiking rails as fast as we could, and not fifty yards behind us the trains came along with ammunition and supplies. We got into Marcoing almost as soon as the Tommies did, and there we found the German railroad in fine shape and we hooked right up with it and the trains moved on over the German rails.

With BRAN-EATA—the Wonderful Cereal Food with Laxative Effect.

Avoid medicines. Throw away your pills and purges. Banish constipation by eating BRAN-EATA—the delicious cereal food containing bran—nature's own laxative in delightful form.

A Means to Better Health Laxative—Nutritious—Ready to Eat

Don't confuse BRAN-EATA with any of the other bran foods on the market. BRAN-EATA is different—palatable—truly delicious. It contains all the strength-giving qualities of crispy toasted corn flakes—all the laxative virtues of clean sterilized bran—blended by our original patented process—shaped into biscuit form—crispy toasted—ready to serve.

Bran in Palatable Form

Although BRAN-EATA contains more than 50% bran, you would never know it by the taste, so skillfully has the bran been blended with other delicious and nutritive ingredients. But the bran is there—rich in those essential phosphates, lime and other salts which are necessary to build muscle, bone and brain—and supplying a plentiful amount of roughage to assure regular, normal action of the intestinal tract.

Saves Sugar—Saves Wheat

BRAN-EATA is already sweetened and saves sugar. It is ready to eat and saves cooking. It contains corn flakes and bran and therefore saves wheat. And Bran-eata Biscuits are economical—six full servings for 10¢.

Try Bran-eata For A Week

Get acquainted with this greatest of all cereal foods—learn what bran will do for you. Get a box of BRAN-EATA from your grocer today—serve them to the entire family—judge them by the good they do.

Served at Restaurants

In response to the great demand, good restaurants and hotels have placed BRAN-EATA on their bill of fare and will be glad to serve you. Ask for it.

NEW-YORK TRIBUNE SAYS WAR COUNCIL IS NEED OF HOUR

**Big Business Men Should Be Put
in Charge of More of Work,
Editorial Says.**

CRITICISES PREPARATIONS

**President Great Statesman, but
Weak in Organizing Fighting
Machine, It Is Said.**

NEW YORK, Jan. 22.—The following editorial, printed today by the New York Tribune, which, early in 1915, brought out Theodore Roosevelt as its candidate for the presidency and urged his nomination until the Chicago convention chose Charles E. Hughes, epitomizes the attitude of the political opposition to the administration on war policies and methods:

"We believe it is time to speak, simply and directly, of some things which are vital to this nation and to our allies in the war.

"President Roosevelt has back of him a loyal and undivided nation. Its great mass have only one thought, one wish. That is, to win this war, and toward that end to throw the whole of its great strength. With high felicity and unflinching clearness he has stated our aims. No living man could have done this more effectively. A whole nation has affixed its resolute approval. We are proud of the high-minded spokesman. He has won for us an enviable place in the councils of our allies. The position of America throughout the world has been heightened by his vividly American utterance. No statesman could have done more.

"When we turn from this splendid personal achievement to the results attained since our entry into the war, in the grim business of organizing a fighting machine, we are sorely disappointed. It is not disloyalty, it is not supercilious, to say that these results have fallen far short of what we might reasonably expect of American genius for organization. Our people have no more salient or distinguishing characteristic than this latter. And a nation which has built up incomparably the greatest industrial machine in the world has a right to believe that the industrial and business conduct of the war shall be on a plane of the highest American capacity.

"Army Lacks Equipment." "It has not been. We have been at war 10 months. And for more than a month before that it was actually clear that our entry was inevitable. We have raised an army of 1,500,000—an admirable effort—but one that England with only two-fifths of our fighting strength, had in the same time equalled or surpassed. And of this number 1,200,000 are still idly tramping the training camps. It is saying nothing that Germany does not know, and that German newspapers have not printed day after day, that there is now little prospect that even the whole of this army can be landed in France this year. They lack a full equipment of rifles, of machine guns, and we lack ships. The war may be lost before we can strike an effective blow.

"It is given to no man to possess every variety of talent. President Wilson may come to rank as one of the nation's greatest statesmen. No good American withholds the full need of his praise. It is no detraction to say that neither his temperament nor his experience has been in the direction of business organization and the effective handling of the types of men who have built up our industry and trade. His lifelong associations have been in the sheltered paths of academic life, which in many minds breeds deep antipathy and suspicion toward the business and executive type of which we speak.

"Avoids Business Men." "How far the President has shared this distrust it is idle to consider. He has had many harsh things to say of big business. Nor is there any need to speak here of his seeming aloofness, nor the fact that he is regarded in Washington as the most inaccessible President who ever entered the White House, nor his apparent disinclination to gather around him and work with men of the aggressive character. It is no endeavor to discredit the administration to say that such men are lacking now."

"The vital problem in this hour of need is how to bridge this situation and bring the splendid talents of the President into contact with and cooperation with the finest organizing executive minds on the business and industrial side that this country can now produce.

"There is now a bill before Congress looking to this end. It is not a partisan measure. It has been framed and backed by conservative Democratic Senators not hostile to the administration. This measure gives the control and direction of the material side of the war, the business of planning and executing the getting of an army and a tremendous store of food and munitions and aeroplanes across the Atlantic and into action. To such a war council England and France have been driven by the same bitter experience we are now having. It is identically such a board as Germany created not 10 months ago or two years after the war began, but long before.

"By its terms Secretary Baker and Secretary Daniels will be excluded from membership in this council, and with a wisdom which, we think needs no insistence.

"What we need—what the whole country is coming to recognize we

need—in the war council is men, if we may so phrase it, of the Cassatt and Carnegie and James J. Hill mold. We would even go so far as to say men of the Harrington, J. P. Morgan and Marshall mold—type of men of a peculiar combination of imagination and daring, men of the seeing eye and the doing hand, in effect, of organizing, co-ordinating and executive genius.

"Can such men be found? Will the President, without thought of political consequences or party advantage, appoint such men? Can he work with them and through them when they are found? We still believe that he can, we believe that he will.

"We believe it because the alternative is fraught with such consequence that it might mean, in this fatal hour, a world disaster.

"One of America's foremost newspapers, a staunch supporter of the President, said tersely the other day: 'Every business man, every loyal American, ought to bring over his desk a card bearing these words, "Germany is winning this war."

"The fact is coming home to the American consciousness. It is coming to the realization of Congress. There is a feeling that, by reason of his temperament and inaccessibility, he is not poignantly clear to the President."

600 NEW WINTER COATS A Sensational Purchase and Sale Doesn't This Sound Differnt?

AFTER A MONTH AND MORE of "Store News" that consisted of nothing but "CLEARING SALES," "CLOSE-OUTS OF BROKEN LOTS," "RIDDADE OF ODDS AND ENDS," and with Winter hardly half over, HOW does it SOUND to hear of, or read an announcement by your LEADING COAT Store, of a purchase of over 600 NEW WINTER COATS—and that they are going to sell them at

Half Price and Less?

OUR Stock-Reducing Sales, and CLEARING Sales, and broken LOT Sales, and ODDS-AND-ENDS Sales have been among the FOREMOST and most frequent AND, just when we had come to the "jumping-off" place (so to speak), especially in Winter COATS—had sold them down to a mere handful—then what happened?

ST. LOUIS' leading Coat manufacturer and one of America's best), KURLANDER BROS. & HARFIELD, who had packed away their late Winter surplus stock of OVER 600 Coats (stored them to hold until next season), knowing they would be worth double their present cost—then suddenly decided to not deviate from their fixed policy of never carrying a garment over to another season and sold them to us at 50% of original cost to produce—which is probably 75% below present value.

ACTION ON STREET PLANS IN THIRTY DAYS

No Opposition at Board of Public Service Hearing to Proposals for Widening.

No opposition appeared at hearing held by the Board of Public Service this morning to the proposal of the Missouri and Presiding Bishop of the Episcopal Church in the United States, will be 81 years old next Saturday. He still performs all the arduous duties of Bishop, which high office he has held for more than 50 years, traveling great distances in all seasons, whenever duty calls.

Asked by the Post-Dispatch for a message to the public at the approach of his birthday, his exhortation is the quotation: "Let all the ends thou aim'st at be thy country's, God's and Truth's."

Daniel S. Tuttle of 54 Vandeventer place, Bishop of Missouri and Presiding Bishop of the Episcopal Church in the United States, will be 81 years old next Saturday. He still performs all the arduous duties of Bishop, which high office he has held for more than 50 years, traveling great distances in all seasons, whenever duty calls.

Asked by the Post-Dispatch for a message to the public at the approach of his birthday, his exhortation is the quotation: "Let all the ends thou aim'st at be thy country's, God's and Truth's."

The Bishop's message is written on old-fashioned foolscap paper with a bold and firm penmanship that gives no hint the writer has passed the allotted three score years and ten, plus ten. A peculiarity of the chirography rarely seen nowadays is the use of the long "s" and the short "s" where the letter is doubled.

Bishop Tuttle's Message.

The Bishop writes:

"The Post-Dispatch has asked me to send a message to the public through its columns.

"I think the invitation came because, if I live, I am to be 81 years old on Jan. 26.

"I do not think that I have any special words of exhortation to profess to my fellow citizens. And I am sure that I cannot write an article for the Post of such pith and point as can the trained scribes of the press.

"But a pagan long ago wrote, 'I am a man, and I think nothing pertaining to man should be an alien thing to me.' Then, surely, a Christian ought not to decline when asked to say something to his fellow men through such an important medium as is the press.

"Yes, I am 81 years old. God has been good to me. My powers are all normal except the hearing."

Three Things to Say:

"I have three things to say:

"1. I never cease wondering at the marvels of science and enterprise presented to my experience in these late years. Steam and electricity and all their applied inventions. The cables under the deep. The swift flying through the trackless deep. What hath God wrought!

"2. Wonder also comes at thought of how people count nowadays. When I was a boy in all America there were three men who were millionaires—John Jacob Astor, Stephen Girard and Alexander M. Stewart. Now millionaires are in all large cities and in not a few smaller towns. Some of them do great good. Hospitals, homes, libraries and governments know that. But we are leaving millions behind and counting in billions now. Soon the word billion must be coined. It is all wonderful.

Made Minister in 1862.

"3. My whole being wants to pour out abundant thanks to Almighty God. I was made a minister in 1862, just as our sad Civil War was swinging into 1863. Just after the sad war was ended. And now men, women and children all over this hemisphere and of ours and under our loved Stars and Stripes are bound together in honest affection for each other and in unquestioned devotion to the flag in a way to delight every American heart and to astonish every foreigner onlooker.

"O, the strength and sweetness of it all! For such restored union and real brotherly love after bitter strife I thank God from the depths of my soul.

"May an old man humbly ask his fellow Americans to thank God for his goodness and to declare the wonders that He doeth for the children of men?

"And if a word of exhortation must be deemed in order, may he be each and every one to set up in his heart this thought:

"Let all the ends thou aim'st at be thy God's and truth's, then if they fail't thou art a blessed martyr."

U. S. GUNBOAT SILENCED
FIRE OF CHINESE REBELS

One Sailor Killed and Another Wounded in Attack on Monocacy on Yang Tse Kiang River.

WASHINGTON, Jan. 22 (By A. P.)—The commander of the American gunboat Monocacy, fired upon by Chinese rebels, reported today that he returned the fire and silenced it.

Secretary Daniels gave out the following:

"On Jan. 17, at 9 a. m., the United States gunboat Monocacy while cruising about 50 miles above Yochow on the Yang Tse Kiang River, was fired on by entrenched Chinese and was hit a number of times. H. L. O'Brien, chief yeoman, was fatally injured and W. N. Donnelly, seaman, slightly wounded. The fire was returned by the Monocacy and silenced."

"It is believed that the Chinese were bandits or revolutionists."

Chinese Hide Behind Dike and Attacked the Monocacy.

PEKIN, Friday, Jan. 18 (By A. P.)—The attack yesterday on the American gunboat Monocacy, in which one sailor named O'Brien was killed and two others wounded, was made near Kien Linh-Sian, on the Yang Tse Kiang and came without warning. The attackers hid behind a dike, on the north bank of the Yang Tse Kiang. The gunboat returned the fire, but with what result is not known. Afterward the Monocacy proceeded to Hankow.

The Japanese steamer Tayuen also was subjected to fusillades.

Two or two teaspoons will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It removes an abundance of rich, creamy lather which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil. CARSON QUIT WAR CABINET BECAUSE OF IRISH PROBLEM

Says His Opposition to Home Rule Makes It Necessary for Him to Resign.

SETTLEMENT NO NEARER

Continued Fight Would Lessen Chances for Agreement in Irish Convention.

LONDON, Jan. 22 (By A. P.)—The political world was surprised today by the announcement that Sir Edward Carson, Minister without portfolio in the war Cabinet, had resigned. This action is a result of the present situation in the deliberations of the Irish convention.

In a letter of resignation, Sir Edward says that on account of his dual position as a member of the Government and leader of the Ulster party, he felt it to be the national duty to resign since the convention may require a decision by the Government on grave matters of Irish policy. Premier Lloyd George, in a laudatory acceptance of the resignation, admits there is wisdom in the course.

Sir Edward has been the leader of the Ulster faction and at the forefront of the opposition to home rule since the beginning of troubled times in Ireland which preceded the war. He was chief organizer of the Ulster army, and there is no sign that his convictions have altered, although changed conditions resulting from the war have moved him to a different policy and the abandonment of his hostility to an agreement between the Irish parties.

There is no indication in his letter that this is his disposition. If he resigns to resume the leadership of a belligerent and hold fast policy, the prospects of an Irish settlement by the convention are darkened greatly.

Conditions Have Changed.

Sir Edward, in his letter to the Premier, says that when he joined the Cabinet he had no consideration in mind except the prosecution of the war, which he had not anticipated that the Irish question would be reopened during the war.

Subsequently, the letter continues: "When the convention was proposed I used my influence to induce friends to participate in an effort to reach a settlement, but on account of the dual position I held as member of the Government and leader of the Ulster party I felt it incumbent on me to stand aloof from the convention. It, however, is apparent that whatever the issue of the convention, its proceedings may lead to a situation demanding a decision by the Government on grave matters of policy in Ireland."

After anxious consideration I feel that it would be advantageous for the War Cabinet to discuss this policy without my presence. *** I also desire to be entirely unfettered in forming judgment on any situation that may arise, taking account both of the supreme duty that rests on us all in assisting the prosecution of the war and my personal obligations as leader of the Ulster Unionist party."

The Daily News says there is reason for stating that President Wilson quite recently made urgent representations to the British Cabinet on the desirability of an Irish settlement.

GEORGE H. SHIELDS MADE MAJOR

Retired Army Captain Is Recalled to Service.

George H. Shields Jr. of 14 Kingsbury Place, St. Louis, Captain of the United States army in 1898, has been recalled to service in the National army, with the rank of Major. He will depart for Washington tomorrow to take up his duties in the Adjutant-General's Department.

Shields enlisted in A Battery in 1898, and went to Porto Rico. He later went to the Philippines as a Lieutenant of the Twelfth United States Infantry and his promotion to Captain of the Third Infantry followed. He served on the islands for five years. He is son of Circuit Judge Shields.

I know that my retirement will make no difference in its cardinal principles, that it will always fight for progress and reform, never tolerate injustice or corruption, always fight demagogues of all parties, never be bound to any party, always oppose privileged classes and public plunderers, never lack sympathy with the poor, always remain devoted to the public welfare, never be satisfied with merely printing news, always be drastically independent, never be afraid to attack wrong, whether by predatory plutocracy or predatory poverty.

LETTERS FROM THE PEOPLE

A Coal Miner's Experience.

To the Editor of the Post-Dispatch.
In reply to the letter, "Is the Coal Miner a Slacker?" published in your paper Jan. 16, I wish to endorse the writer's sentiments. I shall also add my experience as a coal miner here in Gillepsie, Ill., where three of the largest coal mines in the country are located. This morning the miners employed in No. 2 mine, on going to work had to return for the second time this week as there was no work due to a scarcity of water. For the last two months the miners employed in this mine have worked irregularly, but have been unable to make good wages owing to a poor turn of cars in the mine. At a time like this, when coal is so scarce, one would imagine that the coal companies would spare no expense to mitigate this evil, but, in my opinion, the desire for dividends overcomes their sense of patriotism and duty. During the recent blizzard the miners of this city went to work under great difficulties, and the men employed at No. 3 mine are still wading through snowdrifts waist deep to get to work. The general manager of this company, speaking at the coal club banquet, said, "We are not responsible for the ownership of the mines," stating that the mines have never been in better condition as far as equipment, efficiency and the labor condition is concerned. If we are to imply that the above conditions represent efficiency, then give me national ownership.

In conclusion, I would say that if all men were as conscientious and hardworking as the miner the journey to Berlin would be considerably shortened for our boys.

"ANOTHER IGNORANT MINER."

Wheatless Days Are Necessary.

To the Editor of the Post-Dispatch.

While in St. Charles on the past Wednesday, I ate lunch in one of the restaurants and much to my surprise was served white bread. On questioning the daughter of the woman that owns the place, I learned that they do not observe either meatless or wheatless days, that in their judgment it was not necessary and that they did not intend to observe either until compelled to. I was told that none of the restaurants paid any attention to either of these days and it was my thought that your paper could make them see the light that evidently shines so dimly in that community.

A TRAVELER.

Meatless Days for All Alike.

To the Editor of the Post-Dispatch.

I have read the letter of the boarder in regard to the family who would not observe meatless and wheatless days. Have just read the reply of the Woman's Food Conservation on Food. Now, who raises such a distinction between the rich and poor? I know a woman who works in rich families. This rich woman gave a dinner on Tuesday, meatless day. She had served no less than five different kinds of meat. This working woman told me about it the next morning. I said, "Why, we all observe meatless days." "Well, don't think the rich do," she said.

I see no need of raising this distinction between rich and poor. We poor people also have a hard enough struggle to make ends meet, all the more so than one meatless day. The hard times right now of so many industries being shut down is naturally making times very hard for the poor. My sons were working in a munitions factory and have been idle since before Xmas. My second son joined the marines because he could not get work, was simply exhausted from being told no work, maybe next week we may use a few men. People who have work have no idea how hard times are, and the rich never feel the cold nor the meatless days, so why don't the Woman's Food Conservation investigate the rich man's table? Then all would feel as though we were all treated alike.

Overheated Apartments.

To the Editor of the Post-Dispatch.
Cannot some rules be enforced in the heating of apartment houses? People live in apartments and having heat furnished complain of being cold when the temperature out of doors is 70, and are most inconsiderate even in such a crisis as this.

With the present cost of coal and the possible shortage, why shouldn't they be made to endure such a moderate use of heat as to those who are less fortunate than they would be pleasure?

I am sure that if proper investigations along this line were made, it would be found that greedy tenants are responsible for the greatest waste of coal. G. G. A.

SENATORIAL FOLLY.

Do the American people want President Wilson stripped of all power and authority in the conduct of the war and reduced to a mere governmental figurehead, with a vague function of review and veto?

Do they want the executive department of the Government changed from its constitutional form and an oligarchy of "three distinguished citizens of demonstrated ability" placed in supreme power?

across all the people, because thousands and thousands of other places had darkened their rooms and turned off their radiators when asked to do so as a patriotic service?

The fault, if there was a fault, was that of the fuel administration. It should have taken a census of all the dancing parties arranged for in advance and made its order for a time when there would be no conflict. Don't let war interfere with the dance.

FERMENT SPREADS IN AUSTRIA.

Too much hope is not to be built by the Entente on the reports of industrial and agrarian turmoil in Austria. Discounting, however, the exaggeration due to neutral origin and to assumptions based on censorship policies, the general trend of reports coming from many quarters emphasizes one feature whose significance is not to be ignored.

If they do they favor the Chamberlain bill creating a War Cabinet, with full powers to control and direct all the war activities of the nation. If they do not, if they still have confidence in the capacity, honesty and energy of the President as the head of the nation and its military forces, they will repudiate the Chamberlain bill promptly and decisively.

Mr. Wilson sufficiently characterized the truth-

distorting speech of Senator Chamberlain to brand him as a loose-tongued demagogue for the rest of his career, but it would tax even his exceptional resources in the English language to characterize adequately the fantastic folly of the measure the Senator has fathered to reorganize the Government.

Foment in Russia brought few results until it reached the army. Austria's armies are for the most part under vigilante German masters, who will see to it that the open spread of disaffection is harshly resisted. The greater part of those armies are now employed at a distance from the home centers of population, in Italy and in the new massing of forces for striking in the west.

But reason enough is given to inspire anxious thoughts among the junkers. Austria's will to war and ability to war have suffered a steady impairment. Turkey, too, is almost at the end of her rope. Since the Czar's fall we have been told that the short-cut to peace would be a successful rebellion against Hohenzollernism in Germany, but after a year of observation and study, the international diagnosticians have agreed that such a happening is improbable.

But how about a revolution in Austria? From

the first year its heart has not been in the war. To its polyglot population certain of the Bolshevik doctrines are wonderfully appealing. Next to a revolution in Germany itself would be a revolution in Austria. And next in importance to the actual outbreak of revolution in Austria would be reliable reports of the taking root there of Wilson's peace principles in the minds of millions of its population.

THE LIFE OF DEMOCRACY.

"No democracy," said Premier Lloyd George, in a speech to British laboring men, Friday, "has ever long survived the failure of its adherents to supplement his great responsibilities."

The phrase is one of those apt ones for which the Prime Minister is famous. It is historically correct. It may perhaps be old-fashioned to mention it, but the break-down of popular enthusiasm and self-sacrifice caused the Athenian republic to decay; it was not until the people were willing to entrust to others the duty of protecting the commonwealth that Rome began to degenerate. In the present great struggle against imperialism democracy can win, but it cannot do so unless it is willing to pay the utmost price. If democracy is to be defeated it will be because it deserves to be defeated.

THE LENINE PROGRAM.

Robert Crozier Long translates for a New York paper a statement by Nicholas Lenin, the Russian Bolshevik Premier, of what he hopes the Bolshevik Government will be able to accomplish in Russia and then in the rest of the world.

Readers of Trotzky's book, now running in the Post-Dispatch, will think of him as a man who, while hoping for complete internationalism, still respects national lines and national enthusiasms. In fact, he admits that these must still persist, even when the nations have united as an economic whole, if that ever comes about.

The Republican party has not had an easy row to hoe since the war began, and if you will let me dispose of this point first I will subsequently tell you why, in my opinion, it is to have a still harder row to hoe when the war is over. It found itself at the outset of the war in the anomalous position of not being in power. War made the Republican party, and it was on the preserved fruits of war that it sustained itself for half a century. The Democrats beat it into the jam closet a couple of times; but that was all. The Republican party considered itself to be the custodian of all those institutions for which the country at one time and another had bled and died, and for a war to break out with some other party in temporary custody of those institutions was about as preposterous a thing from the Republican viewpoint as ever happened in this republic.

"We are not forgetting, of course, that Democrats in the northern states were not much better off, if any, during the Civil War, than Germans in this country were when we went to war with the Kaiser.

Theirs was an oftentimes embarrassing predicament, and it became necessary for a Democrat in the North to make twice the show of patriotism expected of a Republican. Some of us with very good and patriotic German friends in this country have reason to know that sort of thing works, and we can therefore understand some part of what is in the minds of many Republican leaders with respect to Democrats having the Government now. That has been to them for 50 years peculiarly a Republican function, and we may be sure they had apprehensive apoplexy when they saw everything that we hold sacred in the republic advancing upon Armageddon under Democratic leadership.

FEDERAL RESERVE BOARD TO CURB CREDIT EXPANSION

in Action Check of Upward Movement of Prices, Report to Congress Says.

TO STRENGTHEN RESERVES

Net Earnings of Twelve Members in 1917 Were \$11,200,000.

WASHINGTON, Jan. 22 (By AP)—The effect of credit expansion on the general rise of prices, and the part the American people can play in counteracting inflation by war time economies, were emphasized today by the Federal Reserve Board in its annual report to Congress.

Explaining that even though credit expansion is not entirely responsible for increases in prices, the board said: "It regards it as one of its most important duties to prevent, as far as practicable, expansion of bank credit from running an uncontrolled course."

"Goods and credit," says the report, "must be saved to the utmost of our ability in order to check the upward movement of prices and in order to free for the use of the Government the goods and savings released for the winning of the war."

"The condition of a greatly expanded currency will be improved as he believes, as the public permits of its use of absorbing the Government's savings."

To Strengthen Reserves.

Before the third Liberty Loan, the board adds, Federal Reserve banks must reduce their investments to strengthen reserves and avoid further expansion that has accompanied the first two Liberty Loans. The board does not say specifically how it will affect the loan bonds shown in the six previous issues.

On the whole, the views of the rail situation, present and future, expressed to the Senate Commerce Committee by the Government's Director-General, were favorably received. But none of these findings was reflected in the market, which sold down fractionally under light trading, and with only professional operators gainsizing the movement.

"For the most part, the movement advanced on the Stock Exchange, many to the extent of 1 or 2 points. The movement, however, had all the earmarks of having originated among the professional operators."

"Oil, tobacco, steel, cotton shares made the largest gains, with the railroads up fractionally. The reverse came about noon, and thereafter the trend was downward. Quotations on the new cotton morning, Rickey's market would be up 100 points."

Branches had decided to increase his salary until A. Mason was the assistant secretary which means Rickey's market would be up 100 points."

"No specific cause could very well be assigned for the moderate reaction of prices on the Stock Exchange to-day. It might possibly have been imagined that the arrival of another storm, of a character to impede the strenuous efforts to keep railway traffic moving, would have caused some relaxation of cheerfulness. But such a cause is not an influence on the market and something else must be the cause.
